Presentation:

Wellcome to my art style. Following the rules of painting and far from complexes, my only purpose is enjoy while working.

It drives me to an innocent and free way in which spaces left without colors acquire importance.

My different sizes of acquarel are dealed with temper and, at the same time, sensitiveness.

Some other things taken into account are the moment I consider the paint is over or if I'm aware of my evolution through the years (I mean little changes but important enough).

Either dead nature, sea or coast images, portraits, towns, city places, animals, forests or mountain landscapes... Years have teachd me not to close me to new attempts and try new things; I dare with new slightiy details.
